

Juan V. Alegre-Requena was born in Alicante (Spain), in 1989. He graduated in Chemistry (2013) and he is currently enrolled in a Ph.D. in Organic Chemistry, under the supervision of Dr. Raquel P. Herrera and Dr. Eugenia Marqués-López, at the University of Zaragoza. He is currently working on the synthesis of squaramides, their application in organocatalysis and their biological properties. Also, he is studying several reaction mechanisms by using computational chemistry. In 2014, he performed a doctoral research stay in the Institute of Advanced Chemistry of Catalonia, under the supervision of Dr. Gemma Triola, in order to study the biological activity of new squaramide-based structures.
