

Yeimy Mabel Martínez-Triana was born in Belén, Boyacá (Colombia). In 2013, she received her B.Sc. degree in Chemical Engineer at Universidad Industrial de Santander (Bucaramanga, Colombia). Her thesis entitled "Solubility behaviour of n-coumarin in supercritical carbon dioxide: experimental study and semiempirical correlation" was carried out in the Food Laboratory at Universidad del Valle (Santiago de Cali, Colombia), under the supervision of Prof. López-Giraldo and Prof. Bolaños. In 2014, she completed the research internship "Polyphenols extraction from agricultural wastes of cacao-chocolate chain using supercritical carbon dioxide and ethanol" and worked as Colciencias Young Researcher in the Food Laboratory at Universidad Industrial de Santander (Bucaramanga, Colombia) and the Institute of Biotechnology and Agroindustry at Universidad Nacional de Colombia (Manizales, Colombia).

Besides chemistry she likes reading, doing sports and listening music.
