

Elaine Armelin is Associate Professor of Material Science, Industrial and Chemical Engineering at the Universitat Politècnica de Catalunya (UPC, Spain), and part time scientist at the Center for Research in NanoEngineering (CRnE). She received her Bachelor's degree in Chemistry in 1995 and Master Degree in Organic Chemistry in 1997 at the Universidade de São Paulo (USP-Brazil). In 1997 she moved to Barcelona to perform her PhD studies in Polymer Science, under the supervision of Prof. Jordi Puiggali, at the Department of Chemical Engineering (UPC). She is co-author of several peer-reviewed publications and patents. Her main interests are characterization of polymeric materials and corrosion protection by using organic-inorganic coatings. In 2015, she carried out a research stay in the group of Prof. Díaz (Regensburg).
