

*Isaac Giménez Sonsona was born in 1991 in Zaragoza (Spain). He received his B.Sc. in Chemistry at the University of Zaragoza in 2014, with the thesis entitled "Enantioselective Organocatalytic Study of Hydrophosphonylation Reaction with Hydrazones" under the supervision of Dr. Pérez Herrera and Dr. Marqués López. During this year, he also completed a research internship in the group of Prof. Dr. Gimeno Floría, exploring the use of organometallic compounds in the catalysis of several processes. Currently, he is finishing his Ph.D. in Organic Chemistry at the University of Zaragoza in the group of Dr. Pérez Herrera. His doctoral research mainly focuses on the development of enantioselective organocatalyzed reactions to produce biologically active compounds.*
