

Ting Li grew up in Dalian, a coastal city of China. She obtained her bachelor degree in Chemistry at Dalian University of Technology. During this time she spent one year in Munich as an exchange student at TUM. In 2014, she started her Master studies at the University of Regensburg and accomplished her internship "Towards the synthesis of Agropyrenone" under the supervision of Dr. Fleisher. She also conducted a laboratory project concerning "PAMAM-dendrimer coatings as protein-repellent surface" in the group of Dr. Müller.

Most of the free time, she enjoys swimming, cooking, traveling and photography.
