

Dennis Kühbeck was born in 1984 in Passau (Germany). He visited the Gymnasium Vilshofen and obtained his Abitur in 2004. In 2008 he received his BSc degree in Chemistry at the University of Regensburg (“Synthese fuoreszenter Cyclen-Komplexe” in the group of Prof. König). His Master thesis entitled “Syntheses and Evaluation of Chitosan Hydrogel Spheres as Green and Reusable Catalysts” was carried out in the group of Dr. Díaz-Díaz at the University of Regensburg in 2010. Currently, he is working on his PhD thesis dealing with the synthesis of biopolymer-based functional gels and their application in catalysis.

Beside chemistry his hobbies are sports (especially football and running).
